

IN THE CLAIMS

The following is a complete listing of revised claims with a status identifier in parenthesis.

LISTING OF CLAIMS

- 1-3. (Cancelled).
4. (Previously Presented) A method as in claim 50, wherein said group further includes receipt of a message from a wireless audio source.
5. (Previously Presented) A method as in claim 50, wherein said group further includes a particular date and time.
6. (Cancelled).
7. (Previously Presented) A method as in claim 50, wherein said group further includes receipt of an electronic message at a wireless audio source.
8. (Previously Presented) A method as in claim 50, wherein said group further includes a request to communicate via a mobile telephone.
- 9-12. (Cancelled).
13. (Previously Presented) A method as in claim 50, further comprising selecting at least another of said received audio signals after said triggering event has concluded.

14. (Previously Presented) A method as in claim 50, wherein said selecting is performed according to a plurality of selection instructions.

15. (Original) A method as in claim 14, wherein each of said selection instructions is associated with a respective electronic device so that selection of a particular electronic device occurs in response to a triggering event included in the associated selection instruction.

16. (Previously Presented) A method as in claim 50, wherein said group further includes a chronological event.

17. (Previously Presented) A method as in claim 50, wherein said group further includes a mobile telephone transmission.

18. (Cancelled).

19. (Previously Presented) A method as in claim 50, wherein at least one of said electronic devices is a mobile telephone.

20. (Previously Presented) A method as in claim 50, wherein at least one of said electronic devices is an AM/FM radio.

21. (Previously Presented) A method as in claim 50, wherein at least one of said electronic devices is a compact disc (CD) player.

22. (Previously Presented) A method as in claim 50, wherein at least one of said electronic devices is a walkie-talkie radio.

23. (Previously Presented) A method as in claim 50, wherein at least one of said electronic devices is a personal computer.

24-37. (Cancelled).

38. (Previously Presented) A method of switching among wireless audio sources, comprising:

receiving a plurality of Bluetooth™ compliant transmissions at a headset, each including a respective input audio signal, from respective electronic devices; and

selecting at least one of said received audio signals at the headset in accordance with at least one stored selection instruction overlaid on an initially selected audio signal at the headset, said selection instruction specifying a designated triggering event for triggering said selection,

wherein said designated triggering event is receipt of an advertising message from a merchant.

39-49. (Cancelled).

50. (Previously Presented) A method of switching among wireless audio sources, comprising:

receiving a plurality of Bluetooth™ compliant transmissions at a headset, each including a respective input audio signal, from respective electronic devices; and

selecting at least one of said received audio signals at the headset in accordance with at least one stored selection instruction overlaid on an initially selected audio signal at the headset, said selection instruction specifying a designated triggering event for triggering said selection,

wherein said designated triggering event is selected from the group consisting of receipt of an incoming information update and receipt of an advertising message from a merchant.

51. (Previously Presented) A method as in claim 50, wherein at least one of said electronic devices is a television.

52. (Previously Presented) A method as in claim 50, wherein at least one of said electronic devices is an access point.

53. (Previously Presented) A method as in claim 50, wherein at least one of said electronic devices is an MPEG compatible device.

54. (Previously Presented) A method as in claim 50, wherein at least one of said electronic devices is a PDA.

55. (Previously Presented) A method as in claim 50, wherein at least one of said electronic devices is a notebook computer.
